It is time for a new narrative on schools in Australia. Lifting Australia's performance on international assessments depends on top-class teaching and learning that meets the needs of all students in all settings. The Alignment Premium focuses on how high-performing countries achieve strategic policy alignment, and how school leaders are professionally prepared to play their part. Analysis of approaches used in 13 countries, including most of the world's top-performers, provides 15 benchmarks against which Australia's performance is assessed. Findings include: Alignment among different levels of government may be commendable in some respects, but there is much that is coercive, contrived, dysfunctional or illusory. While achieving a top-ten ranking will depend on what occurs in schools, attention should shift to how systems are adapting to support all schools to become as good as Australia's best. Lack of trust and inertia are serious constraints on efforts to transform Australia's schools. Programs for professional learning of teachers and school leaders are impressive when assessed against international benchmarks. These should be the top priority. Building on findings in The Autonomy Premium, the focus should be on professional autonomy. The challenge is to design a system in which all those who work in or for schools are fully professional. The Alignment Premium is essential reading for policy-makers, school leaders and researchers who wish to write the new narrative.

Helpful ideas for winning over your new students are provided as well as tips for making lasting first impressions. First-year teachers will benefit from the discussion on the three stages of teaching a lesson as well as tips for keeping students interested during lectures, the pros and cons of using discussion groups in the classroom, and how to use small groups as an alternative approach to traditional instruction. It is important to understand what life is like for today's college student and how these students think and learn in order to effectively do your job. From the bestselling author of Blink and The Tipping Point, Malcolm Gladwell's Outliers: The Story of Success overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. Outliers will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times
