The must-read summary of Don Tapscott, Alex Lowy and David Ticoll's book: "Blueprint To The Digital Economy: Creating Wealth in the Era of E-Business". This complete summary of the ideas from Don Tapscott, Alex Lowy and David Ticoll's book "Blueprint To The Digital Economy" shows that the digital economy – computers teamed with communication networks – has the potential to transform almost every consumer and business activity. These changes are having the effect of forcing organizations to amend notions and practices about the nature of competition, the process by which wealth is created and even the nature of the firm itself. In short, the digital economy changes every assumption ever made in business. It is also allowing completely new commercial entities – like e-business communities which use the digital economy to conduct commercial transactions and collaborate to create new wealth – to flourish and grow like never before. And it is forcing established firms to enter into partnerships and alliances with entirely different and disparate business entities. Clearly, the digital economy opens enormous possibilities and opportunities. The challenge lies in turning the possible into the probable and then into the actual. Added-value of this summary: • Save time • Understand the key concepts • Increase your business knowledge To learn more, read "Blueprint to the Digital Economy" and discover the perfect guide to getting acquainted with the rules of the digital economy.

This work offers a summary of the book ""BLUEPRINT TO THE DIGITAL ECONOMY: Creating Wealth in the Era of EBusiness"" by Don Tapscott, Alex Lowy & David Ticoll. In Blueprint To The Digital Economy, Tapscott, Lowy and Ticoll argue that the digital economy - computers teamed with communication networks - has the potential to transform almost every consumer and business activity. These changes are having the effect of forcing organizations to amend notions and practices about the nature of competition, the process by which wealth is created and even the nature of the firm itself. In short, the.

Describes the ways in which the children who are growing up and being educated in an environment heavily influenced by the Internet will set the political, economic, and cultural agenda as adults

On 25 July 2013, the Minister for Foreign Trade, Nicole Bricq, asked the French Digital Council to submit its recommendations on the digital part of the planned Transatlantic Trade and Investment Partnership (TTIP) currently under negotiation between the European Union and the United States. The working group, directed by Benoît THIEULIN, therefore held a series of hearings with stakeholders in the negotiations, including French and American companies, civil society organisations, professional organisations and administrations. In March 2014, its 30 members unanimously voted an opinion. The report, named "Strengthening EU's negotiation strategy to make TTIP a sustainable blueprint for the digital economy and society", is composed of the voted opinion and several recommendations on specific issues that might be

discussed during the TTIP negotiations. The Council considers that : European Union values are vital levers for building a negotiating strategy on chapters that include digital issues;Europe's digital market structure must be based on lasting safeguards: the right to regulate, the ability to regulate in the future, and respect for the European Union's sovereignty and freedom of competition are among their number. They must be used in negotiating the digital chapter of the proposed partnership;The European Union is in a position to add to the opening-up and extension of its digital market by developing trade relations with new partners such as countries in Asia and Africa;With a market of 500 million consumers, mobilisation of both public and private stakeholders is a priority: putting together a digital strategy and strengthening alliances between Member States are both positive levers for successful trade negotiation.

PARADIGM SHIFT explores changes in the nature and role of information technology in business in the late 20th century. "This is an important book. Executives who ignore it do so at their own peril. The authors argue persuasively that the information age is entering a second era--one marked by decentralization, empowerment, and affordability. The consequences are both hopeful and far reaching".--Paul Allaire, Chairman and CEO, Xerox Corporation.

Engagement is the key to success for today's businesses. The world we live in is radically different today from what it was even just five years ago. It is hyperdigital and becoming more so every day. Ironically, we use connected to describe this new world, yet we are asked to interact increasingly through apps and browsers instead of via face-to-face contact with customers and clients. Even with all the incredible advances, it's worth pondering whether organizations actually feel more connected to the people and the companies they do business with. In Engage to Win, author Steve Lucas introduces a new model for marketing to address this new hyper-digital world—one founded on engagement. He introduces the idea that embracing and driving engagement throughout organizations and using it with customers, prospects, employees, and partners is what will set companies apart. This digital era demands that marketers understand the science of marketing in order to scale and succeed. But if we embrace mathematics alone, while abandoning feeling, meaning, and authenticity, we will fail to deliver on the desires of our clients: to feel listened to and understood. ?So how do we win the heart and mind of the buyer in this new world? Develop a real strategy around engagement by practicing these simple steps: listen, learn, and engage. Listening creates insights, insights drive engagement, and engagement drives revenue. Truly engaging with customers will allow businesses to see, in real-time, when customers' wants and needs are changing, so businesses will be able to adapt, survive, and ultimately thrive!
