The use of COSMOS

for the analysis and

solution of structural

dynamics problems is

introduced in this new

edition. The COSMOS

program was selected

from among the various

professional programs

available because it has

the capability of solving

complex problems in

structures, as well as in

# Online Library

## Dynamics

other engineering fields such as Heat Transfer, Fluid Flow, and Electromagnetic Phenomena. COSMOS includes routines for Structural Analysis, Static, or Dynamics with linear or nonlinear behavior (material nonlinearity or large displacements), and can be used most efficiently in the microcomputer.

# Online Library

## Dynamics

The larger version of COSMOS has the capacity for the analysis of structures modeled up to 64,000 nodes. This fourth edition uses an introductory version that has a capability limited to 50 nodes or 50 elements. This version is included in the supplement,

**STRUCTURAL
