Using U and W on a CNC Lathe . On a CNC machining centre incremental and absolute are modal. That means when one is active it stays active until you programme the other. Now on a CNC Lathe it's different. You just change your axis to U or W. You can remember this by its position in the alphabet UYW correspond to XYZ.

Your CNC lathe's controller will be setup to start in either diameter or radius mode. In diameter mode, X-axis values specify diameters, while in radius mode, they specify a radius from the axis. As you would expect, diameter mode X-axis values are exactly twice what the radius mode values are, so it is important that you know which mode your lathe is using.
