Engineers need to acquire "Back-of-the-Envelope" survival skills to obtain rough quantitative answers to real-world problems, particularly when working on projects with enormous complexity and very limited resources. In the case studies treated in this book, we show step-by-step examples of the physical arguments and the resulting calculations obtained using the quick-fire method. We also demonstrate the estimation improvements that can be obtained through the use of more detailed physics-based Back-of-the-Envelope engineering models. These different methods are used to obtain the solutions to a number of design and performance estimation problems arising from two of the most complex real-world engineering projects: the Space Shuttle and the Hubble Space Telescope satellite.

In lives filled with passion and temptation, five young people experience the many forms of love. Achieving their wildest dreams takes everything they have, and soon their romances, friendships, and dearest personal values are tested. Along the way, their lives intertwine in surprising ways-on the lush soccer fields of college campuses in California and the glamorous fashion runways and football pitches of Italy and France. The brilliant and beautiful Sallie is embarking on an exciting international modeling career, but, so far from home, she runs the risk of getting lost in more ways than one. Her college sweetheart, Marco, is focused on his goal of becoming a professional soccer player and relies on the expert advice of his mentor, Lorenzo. But Lorenzo must figure out his own way to stay on top. Meanwhile, their athletic friend Dave has already hit rock bottom, attracting the empathy of nursing student Autumn. She'll do anything she can to help Dave, despite the risk of getting dragged down with him. Boundaries exist in the game of soccer, but in life they are all too easily crossed. Before long these five friends will learn exactly how far relationships can bend before they break.

The eclectic stories in this collection are bound by the threads of desire in its many forms, above all, the desire for love and a place of safety in a world where being Black and gay can thwart the fulfillment of that longing. The characters are complex, driven, difficult, and even, at times, unsympathetic, but always compelling. In other words: fully rounded human beings living complicated lives. A proud Black woman who escaped her rural, impoverished town returns after the collapse of her marriage and faces the scorn of those she left behind. A middle-aged gay man finds his loneliness temporarily relieved by the arrival of a stray cat. An unhappily married woman becomes enmeshed in her bisexual husband's attempt to create a ménage à trois with a much younger man. A 16-year-old boy discovers the power of his sexuality when he embarks upon a dangerous seduction. Two Black men, one mature and rich, the other young and struggling, are drawn into a contentious affair by their shared love of opera. The legendary blues singer Gladys Bentley crashes up against the barriers of race and gender when she gets caught up in a police raid. *Kiss the Scars on the Back of My Neck* is a masterful collection of stories by a gifted writer who has fully hit his stride.
