A resolution to the vexed problem whether a troubadour's love is erotic or spiritual is offered by Paolo Cherchi through a new reading of Andreas Capellanus' *De Amore* (written around 1186-1196). He suggests that Andreas, using a rhetorical strategy that creates ambiguity, condemns courtly love because its claim that passion generates virtue is untenable and deceitful. Although Andreas grasped the core of the courtly love 'system,' namely, the relation between

passion and ethics, he failed to consider the notion of *mezura*, that courtly virtue through which troubadours transformed nature into culture, and erotic passion into social discourse. Cherchi offers an innovative interpretation and a close reading of selected poems. He traces the history of Provençal lyric poetry, highlighting some of the significant personalities and movements.

Naturally aspirated Mopar Wedge big-blocks are quite capable of producing between 600 to 900 horsepower. This book covers how to build Mopar's 383-, 400-, 413-ci, 440-ci engines to these power levels. Discussed is how to select a stock or aftermarket block for the desired performance level. The reciprocating assembly is examined in detail, so you select the right design and material for durability and performance requirements. Cylinder heads and valve train configurations are crucial for generating maximum horsepower and torque and this volume provides special treatment in this area. Camshafts and lifters are compared and contrasted using hydraulic flat tappet, hydraulic roller and solid flat tappet cams. Also, detailed engine builds at 600, 700, 800, and 900 horsepower levels provide insight and reveal what can be done with real-world component packages.

This book explores the implications of talent management in four practical settings across the globe. Focusing on countries in the Asia-Pacific region, Central and Eastern Europe, Latin America and within the Commonwealth of Independent States (CIS), the authors illustrate how multinational corporations (MNCs) can benefit from talent management practices and as a result, develop a strategy of organizational leadership. Offering empirical examples from each region, this book examines how economic and cultural contexts influence talent management. Talent Management in Global Organizations discusses successful cases in different cross-cultural settings, and aims to inspire companies around the world to develop and implement talent management practices effectively.

Electrification is an evolving paradigm shift in the transportation industry toward more efficient, higher performance, safer, smarter, and more reliable vehicles. There is in fact a clear trend to move from internal combustion engines (ICEs) to more integrated electrified powertrains. Providing a detailed overview of this growing area, *Advanced Electric Drive Vehicles* begins with an introduction to the automotive industry, an explanation of the need for electrification, and a presentation of the fundamentals of conventional vehicles and ICEs. It then proceeds to address the major components of
