Has Technology Done More Harm Than Good? | by Chimdi ...

Technology use is detrimental to deep thinking and reflection. One of the key negative impacts is on cognition. The constant stream of new information and alerts we're subjected to when we're connected, encourages us to jump from one activity to another and this has led to us developing a state of mind that's been described as 'continuous partial attention'.

Is our use of technology doing more harm than good? | HRZone

There are also times where technology can make life harder because it is used against nature and can ruin places. Some of those times are: the oil spill in the Gulf of Mexico, China's environmental degradation, World War II, and the second Industrial Revolution. [Read More.](#)

Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended. This book serves as a collection of these statements from great philosophers and thought-influencers of science, past and present. It allows the reader quickly to find relevant quotations or citations. Organized thematically and indexed alphabetically by author, this work makes readily available an unprecedented collection of approximately 18,000 quotations related to a broad range of scientific topics.

Life boils down to two simple questions: What is my purpose, and what should I accomplish during my limited time on Earth? Anyone who has struggled with these questions can relate to Clifton L. West III, a Baptist church deacon who shares his story of an extraordinary life lived by an ordinary man. He writes about his faith and journey through life, offering a message of hope and encouragement for anyone who has struggled with challenges of their own. *Of Life and Time* focuses on the ingredients for a life well lived-- affirmation, love and righteous and loving instruction--even as it shares details about West, who attended school in Topeka, Kansas, just one year after the Supreme Court case *Brown vs. the Board of Education of Topeka* that led to school desegregation. Clifton, a runner, was national champion in the mile run in 1968, led the University of California track and field team, and almost made the 1972 Olympic team. Through his own personal struggles--with the help of his savior, Jesus Christ--Clifton comes to the realization that unconditional love and relationships with others provide the key to good living, even as he realizes his looming mortality. *Of Life and Time* delivers his timely message of personal testimony, a resounding message of unrelenting hope and unconditional joy for those willing to receive it.

The United Nations has proclaimed the 21st century to be the century of water. In this volume, *Water and Women in Past, Present and Future*, scholars analyze the gendered political economy of water resource allocations and importantly, offer recommendations for viable, women-friendly solutions to address scarcity and distribution, among other issues. Contributors also explore feminist analyses of the aesthetic dimension of water and the feminine, since water is often associated with women, shown in cross-cultural examples of mythology, symbols and legends. Intersecting the fields of hydro-politics and aesthetics, this book should be of interest to policy analysts, activists, and academics.

As many can attest, the prevalence of sexual imagery has increased in modern society over the past half century. In this timely new study, Kenneth Kammeyer traces the historical development of sexual imagery in America and society's preoccupation with it, all within a firm theoretical and sociological framework.

From the celebrated author of the best-selling *Physics for Future Presidents* comes "a provocative, strongly argued book on the fundamental nature of time" (Lee Smolin). You are reading the word "now" right now. But what does that mean? "Now" has bedeviled philosophers, priests, and modern-day physicists from

Augustine to Einstein and beyond. In *Now*, eminent physicist Richard A. Muller takes up the challenge. He begins with remarkably clear explanations of relativity, entropy, entanglement, the Big Bang, and more, setting the stage for his own revolutionary theory of time, one that makes testable predictions. Muller's monumental work will spark major debate about the most fundamental assumptions of our universe, and may crack one of physics' longest-standing enigmas.

A former Africa editor for *The Economist*, Robert Guest addresses the troubled continent's thorniest problems: war, AIDS, and above all, poverty. Newly updated with a preface that considers political and economic developments of the past six years, *The Shackled Continent* is engrossing, highly readable, and as entertaining as it is tragic. Guest pulls the veil off the corruption and intrigue that cripple so many African nations, posing a provocative theory that Africans have been impoverished largely by their own leaders' abuses of power. From the minefields of Angola to the barren wheat fields of Zimbabwe, Guest gathers startling evidence of the misery African leaders have inflicted on their people. But he finds elusive success stories and examples of the resilience and resourcefulness of individual Africans, too; from these, he draws hope that the continent will eventually prosper. Guest offers choices both commonsense and controversial for Africans and for those in the West who wish Africa well.

This concise yet incisive text is an excellent choice for courses in the Criminal Justice curriculum, including Corrections, Introduction to Criminal Justice, and other social problems-oriented courses.

Closing Ranks tells of an illustrious career, giving a behind the scenes look at the workings of the Metropolitan Police. One of the founder members of the Black Police Association Charitable Trust, Leroy Logan has had first-hand experience of race relations in modern-day Britain, and he relates how his strong Christian faith helped him persevere in a frequently hostile work environment. Offering encouragement to other black officers to stay on and work to change the culture within the police, Leroy's passion for good policing shines through . . . as does his touching concern to guide and empower young people. 'I was amazed and intrigued by the way Leroy had stood his ground and progressed within the Metropolitan Police against so many obstacles: hostility, outright racism and being repeatedly overlooked for promotion.' Steve McQueen, from the Foreword 'This is a story that needs telling.' Patrick Regan OBE, Kintsugi Hope
